260 GT Plus

Sunoco 260 GT Plus is a high octane, highly oxygenated unleaded race fuel. It is our highest octane unleaded race fuel which makes it a popular choice for racers looking for high octane in an unleaded product.

Because 260 GT Plus contains more oxygen than is allowed in pump gas, it is for off-road and racing use only. However, it will not harm oxygen sensors. Due to its high oxygen content, an increase in fuel flow is required to utilize the full potential of 260 GT Plus compared to conventional non-oxygenated fuels.

Sunoco 260 GT Plus contains additives to enhance shelf life and promote engine cleanliness. As with any gasoline, it should be stored in opaque, tightly sealed containers and kept where temperatures are stable. Properly stored, the shelf life of 260 GT Plus is in excess of 1 year.

Note: exposure to sun light (ultraviolet light) can degrade the octane of this fuel and must be avoided.

Technical Details:

Color	Light Blue
Octane (R+M) /2	104
Research Octane	110
Motor Octane	98
Specific Gravity	0.761
Weight [lbs./gallon]	6.3
Reid Vapor Pressure [PSI]	6.1
10% Evaporation [°F]	148
50% Evaporation [°F]	212
90% Evaporation [°F]	233
Stoichiometric Air/ Fuel Ratio	13.7
Oxygen [weight %]	4.7
Ethanol [volume%]	13
H/C Ratio	1.867
O/C Ratio	0.043
Lower Heating Value [Btu/ Gallon]	110300
Lower Heating Value [Btu/ Gallon]	17400
Dielectric Constant	19
Leaded	NO
